GRADIUS. IT SOLUTIONS

STA TECH EXPO 2026

Managed IT, Cybersecurity & AI, Built for Construction and Trade Businesses

Subcontractors, general contractors and developers trust Gradius to keep their technology running, their data protected and their teams ready for what owners and GCs expect next.

Whether you need a fully outsourced IT department or backup for the team you already have, Gradius fits the way your construction business runs, from the office to the job site.

01
Managed IT
Fully outsourced IT support, infrastructure management and a help desk your office and field teams can rely on, day to day.

02
Co-Managed IT
Work alongside your existing IT staff, covering monitoring, escalations and specialized projects so nothing gets missed.

03
IT Consulting
Planning for a new office, a system migration or a technology refresh across job sites. We plan it and help you execute it.

04
Cybersecurity
Monitoring, endpoint protection and response built to hold up under a GC vendor review or a cyber insurance renewal.

05
AI Governance & Enablement
Let your estimating and project teams use the AI tools they want, with a governance layer that keeps sensitive project, client and financial data from leaking out. Options range from a lightweight governance layer over the AI tools you already use, to a fully managed, secure AI environment.

WHY CONSTRUCTION FIRMS CHOOSE GRADIUS

- One accountable point of contact for every client
- Experience across regulated, deadline-driven industries
- Support built around bid deadlines and job site realities
- Security postures that hold up to GC and owner vendor reviews
- Flexible plans, from fully managed to co-managed support
- Practical AI guidance without the data risk

Visiting us at STA Tech Expo?

Stop by the Gradius booth for a free technology assessment, or scan the QR code on our booth signage to request one and book time with our team.
